Average Effect by Length of Exposure

CS Dynamic ATT: NGFS Membership and GHG Emissions

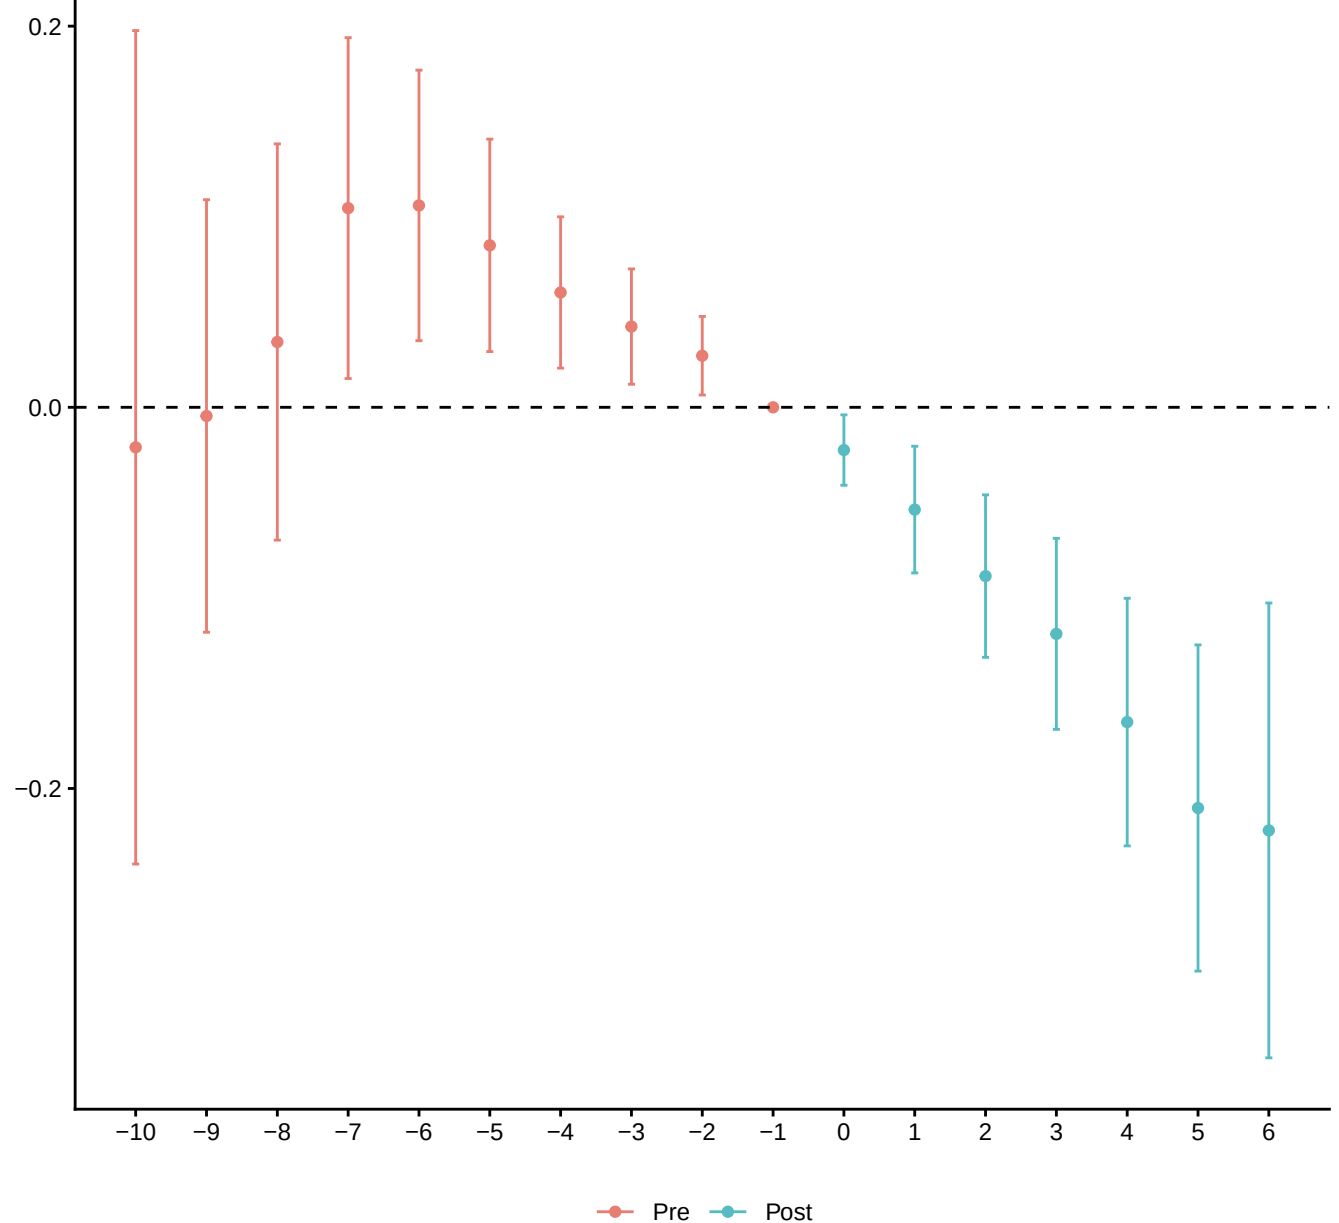

Ribbon: Simultaneous 95% Confidence Band. Shaded region: pre-treatment periods.

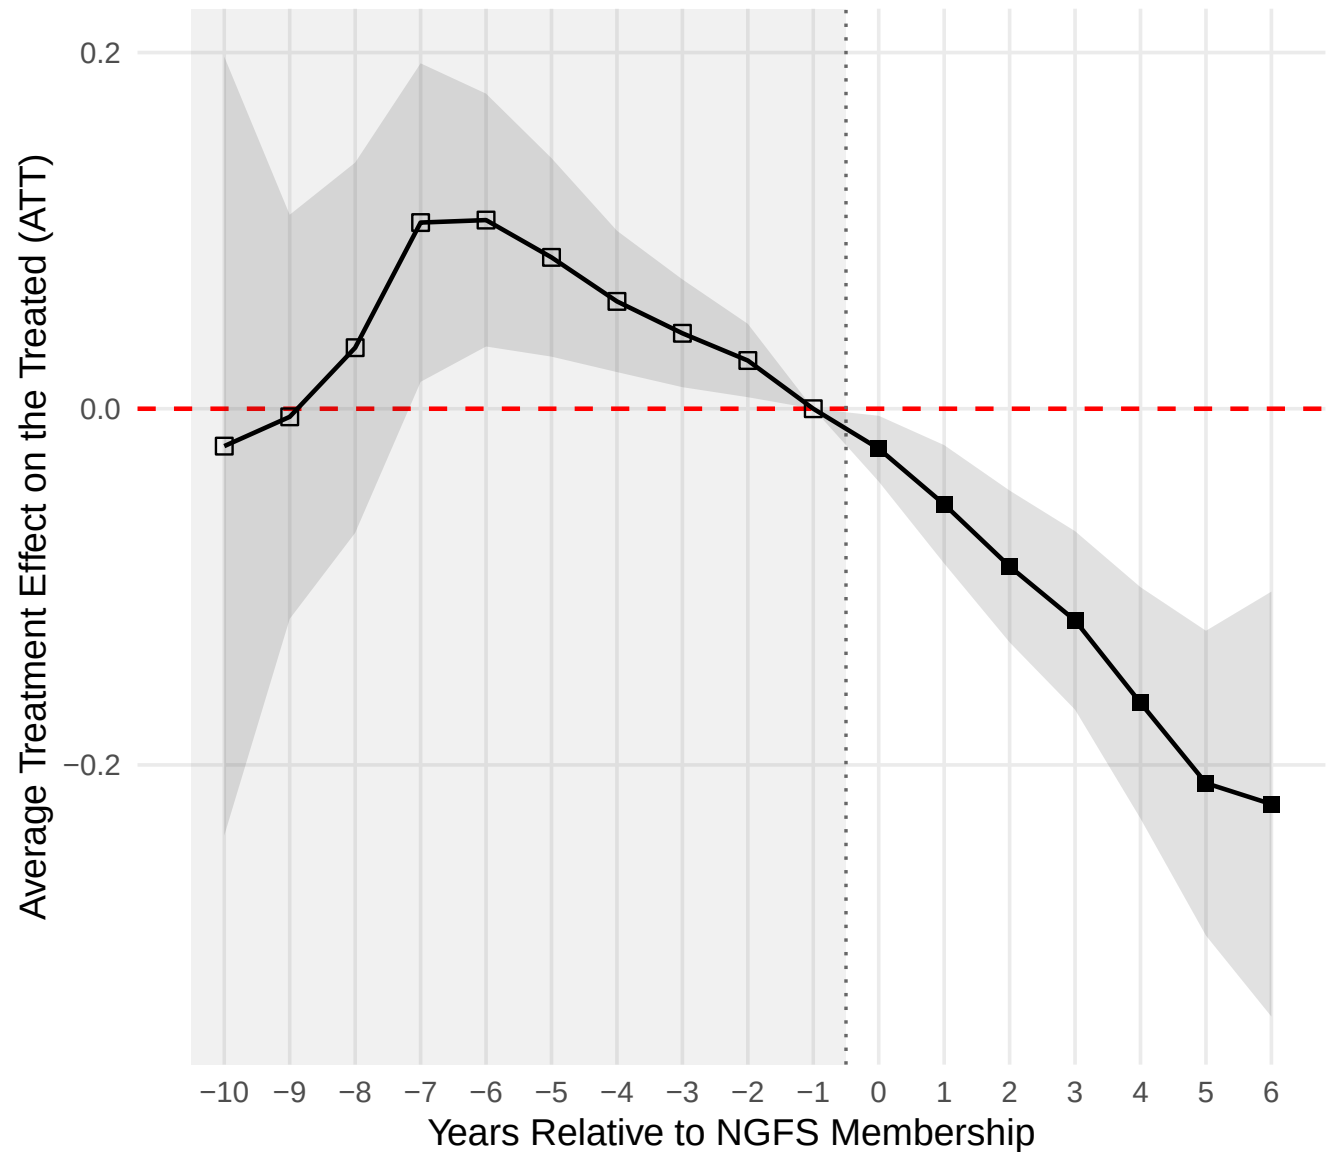

Hollow symbols = pre-treatment periods; filled symbols = post-treatment.

Doubly robust estimator with never-treated controls. SEs clustered by country.

Average Effect by Length of Exposure

CS Dynamic ATT: NGFS Membership and GHG per GDP PC

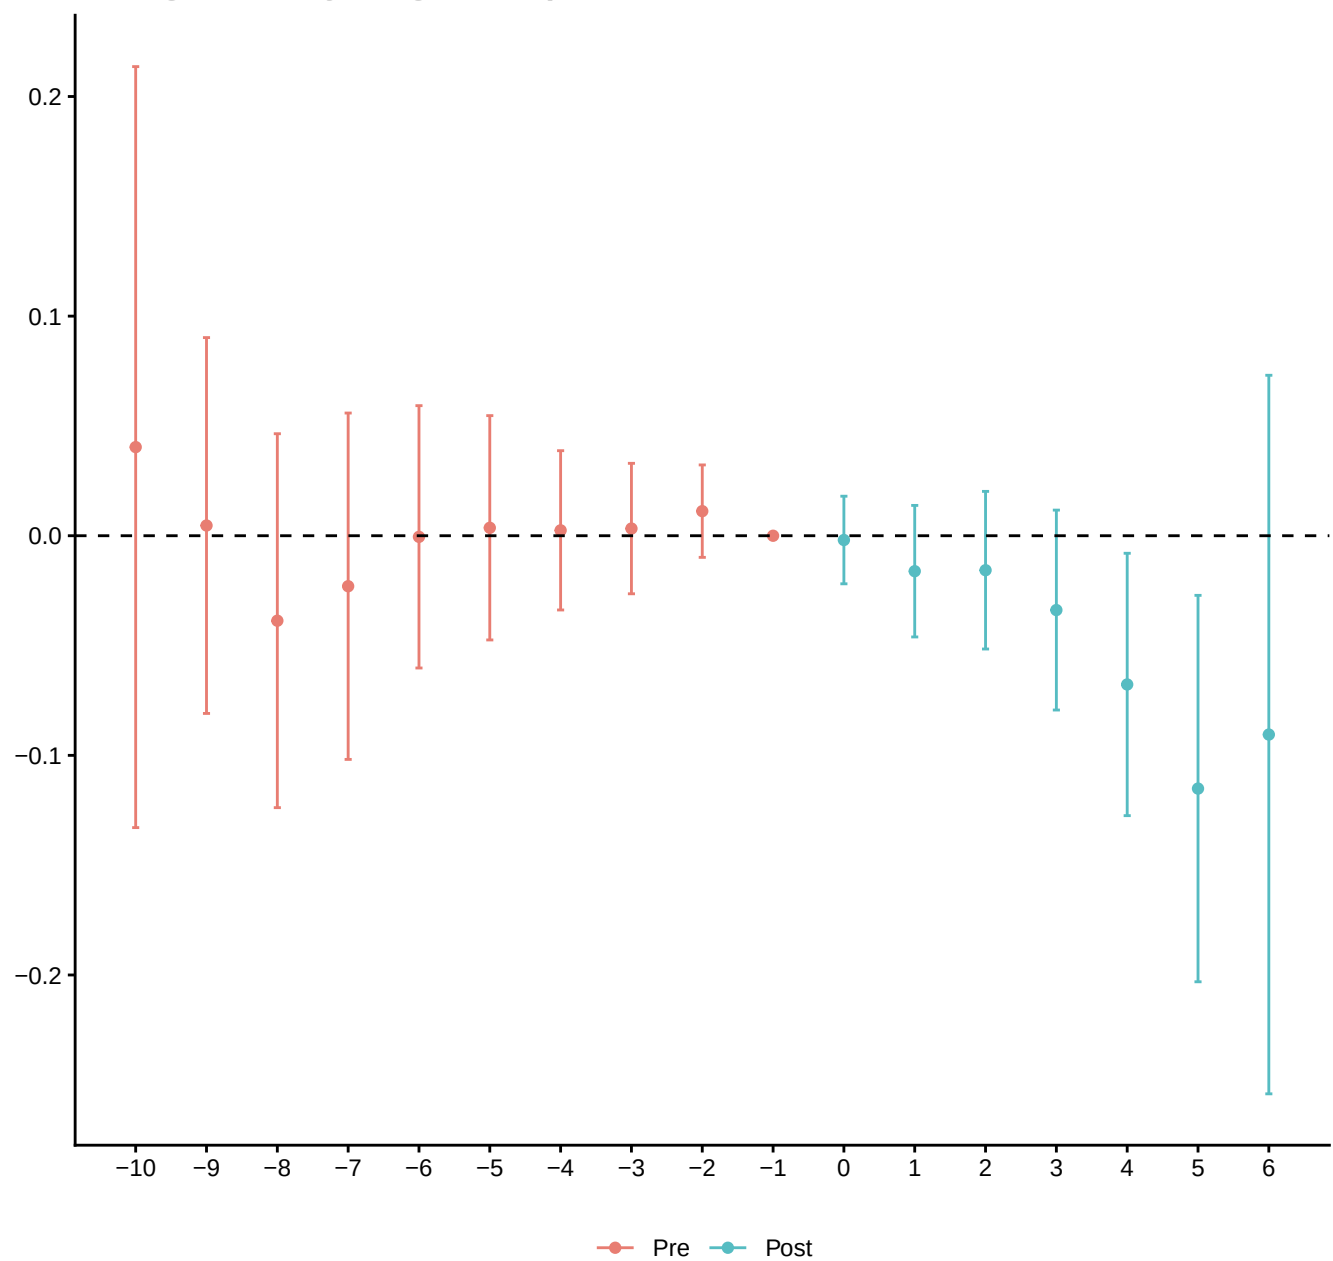

Ribbon: Simultaneous 95% Confidence Band. Shaded region: pre-treatment periods.

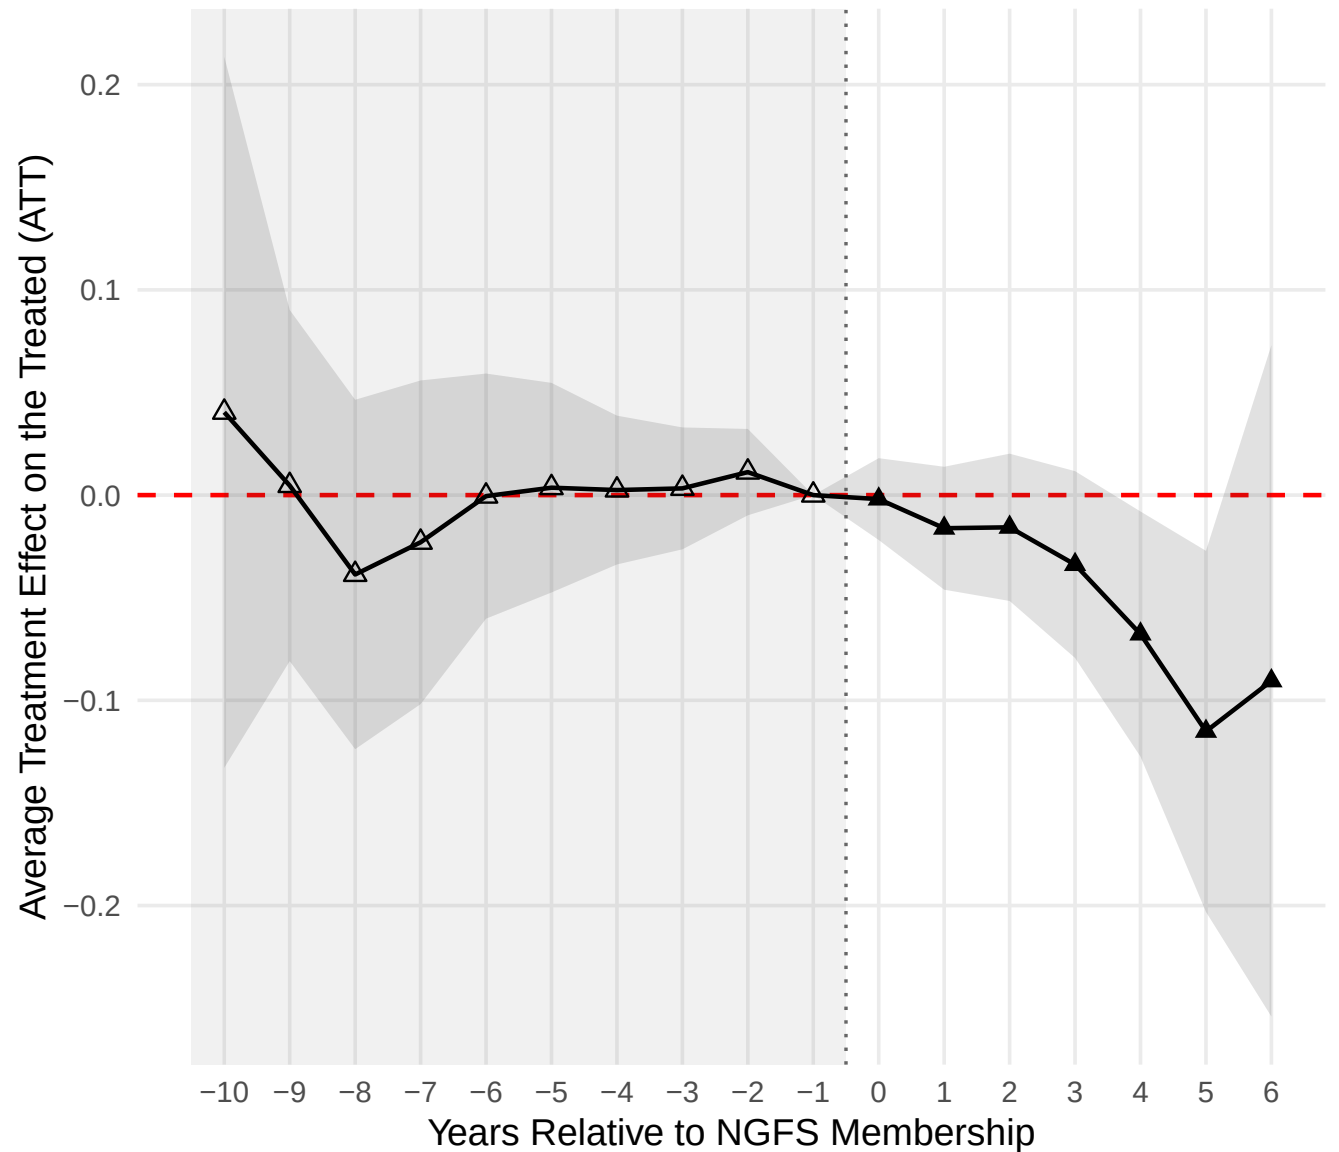

Hollow symbols = pre-treatment periods; filled symbols = post-treatment.

Doubly robust estimator with never-treated controls. SEs clustered by country.

Average Effect by Length of Exposure

CS Dynamic ATT: NGFS Membership and GHG per Capita

Ribbon: Simultaneous 95% Confidence Band. Shaded region: pre-treatment periods.

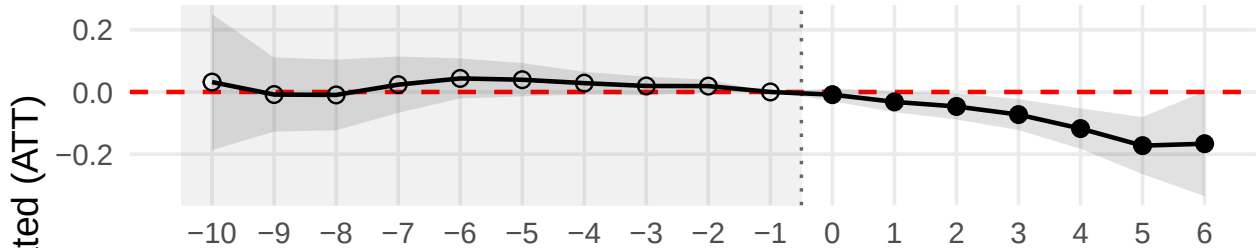

Hollow symbols = pre-treatment periods; filled symbols = post-treatment.

Doubly robust estimator with never-treated controls. SEs clustered by country.

Average Treatment Effect of NGFS Membership on Emissions

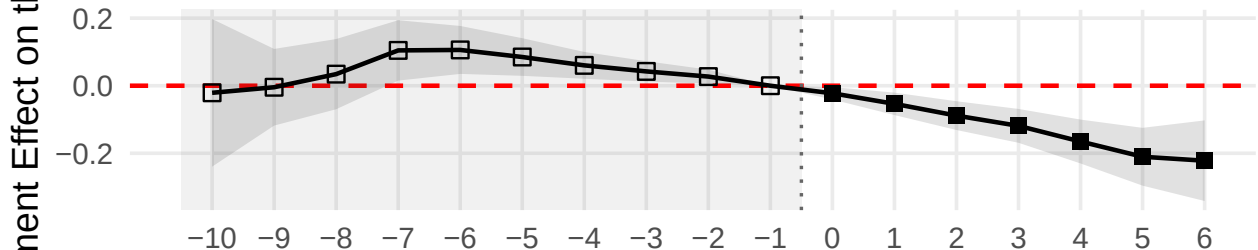

A

Total GHG Emissions

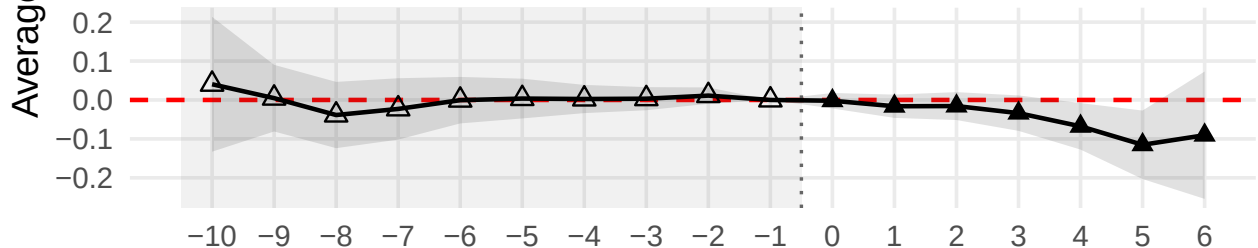

B

GHG per GDP per Capita

C

GHG per Capita

Years Relative to NGFS Membership

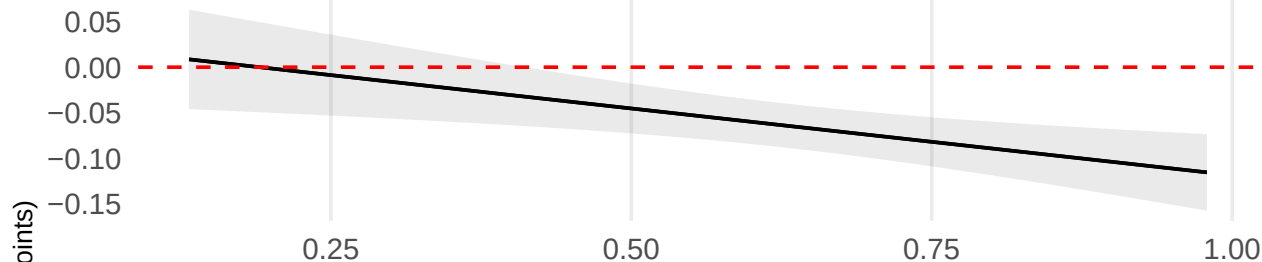

Ribbon: Simultaneous 95% Confidence Band. Shaded region: pre-treatment periods.
Shapes denote model specification. Hollow symbols = pre-treatment; filled symbols = post-treatment.
SEs clustered by country.

Marginal Effect of NGFS Membership on Emissions

by Level of Central Bank Independence

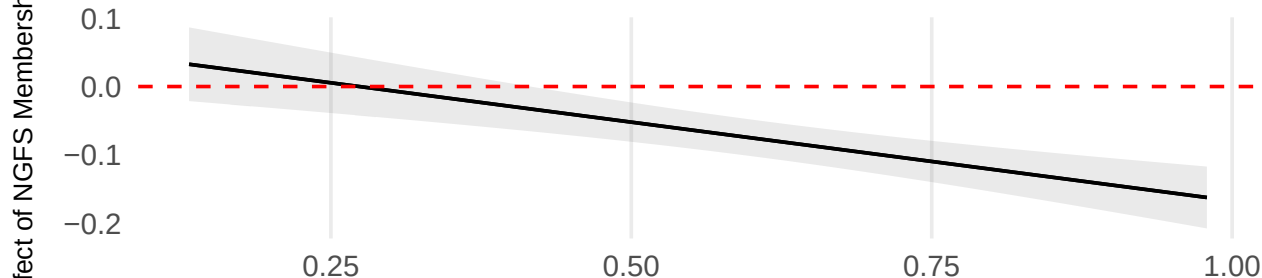

A

Total GHG Emissions

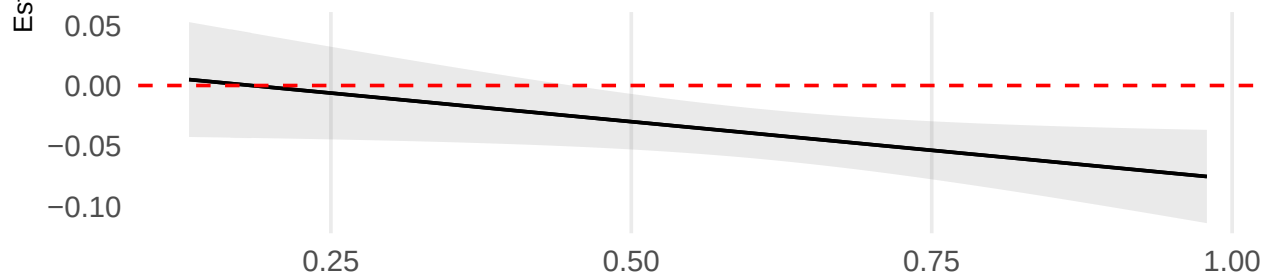

B

GHG per GDP per Capita

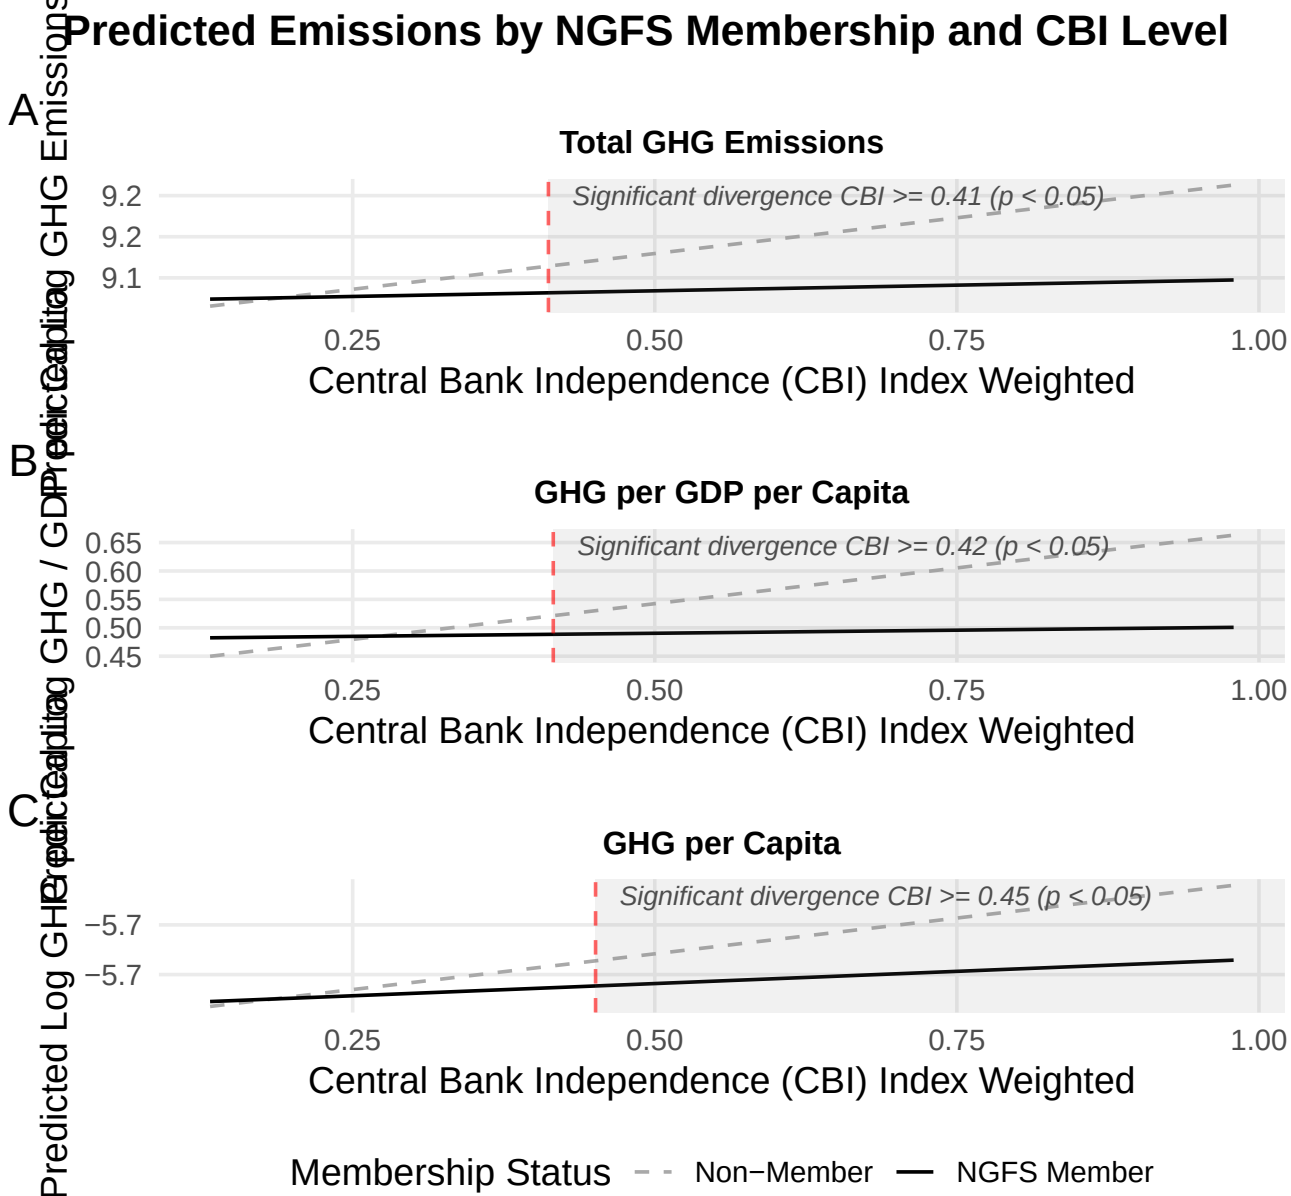

C

GHG per Capita

Central Bank Independence Index Weighted

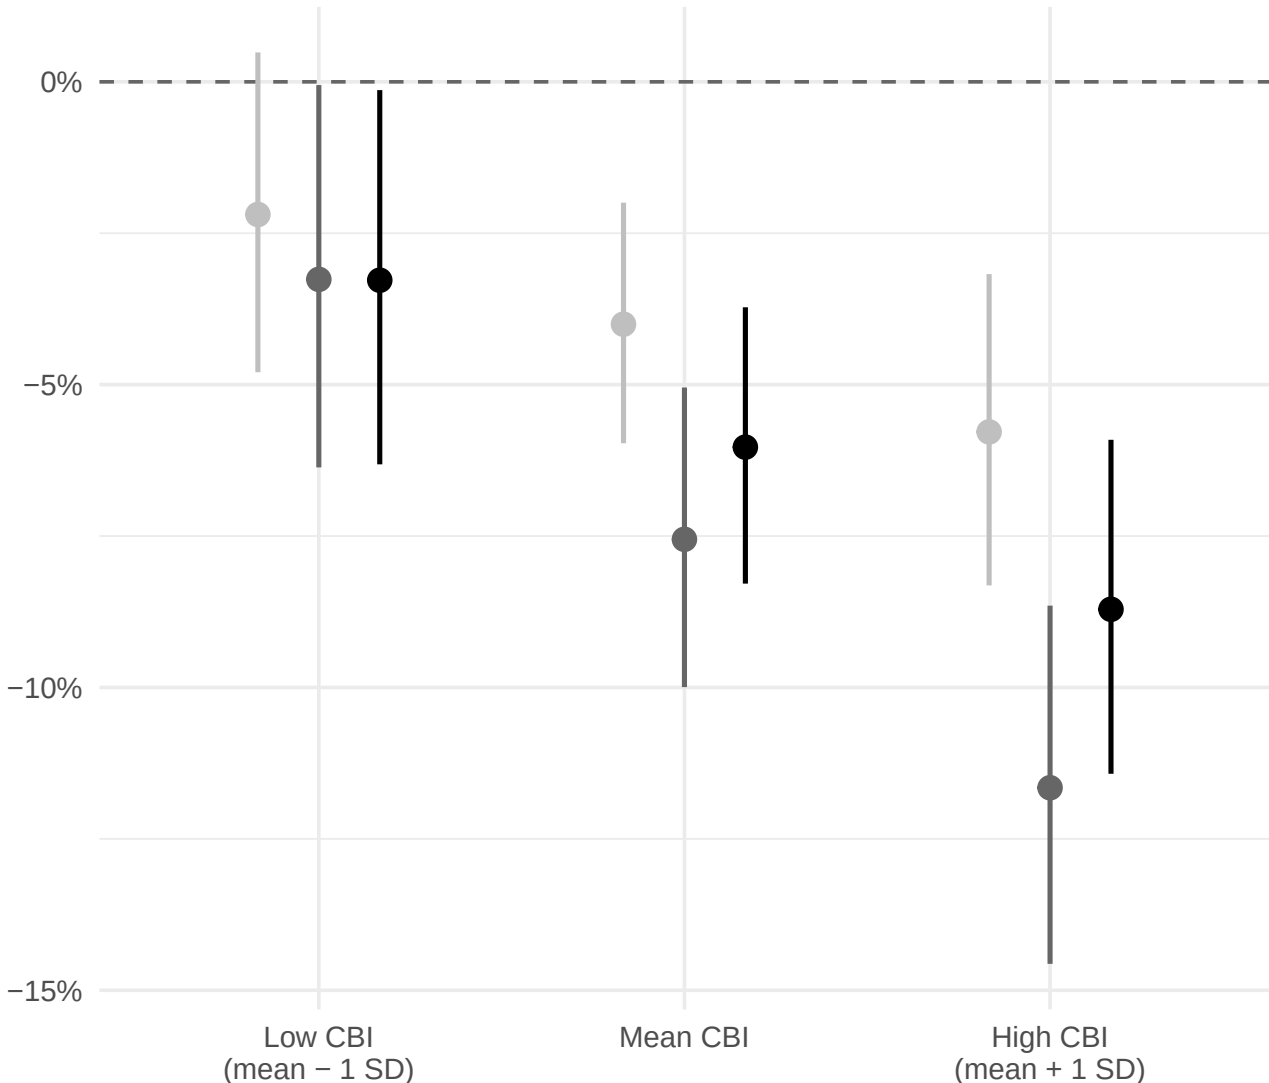

Shaded region and dashed vertical line mark the CBI level above which the NGFS member vs. non-member divergence becomes statistically significant ($p < 0.05$); the threshold is model-specific.

Idea 3: Three numbers instead of a curve

Effect of NGFS membership at low, mean, and high CBI (dot = estimate, bar = 95% CI)

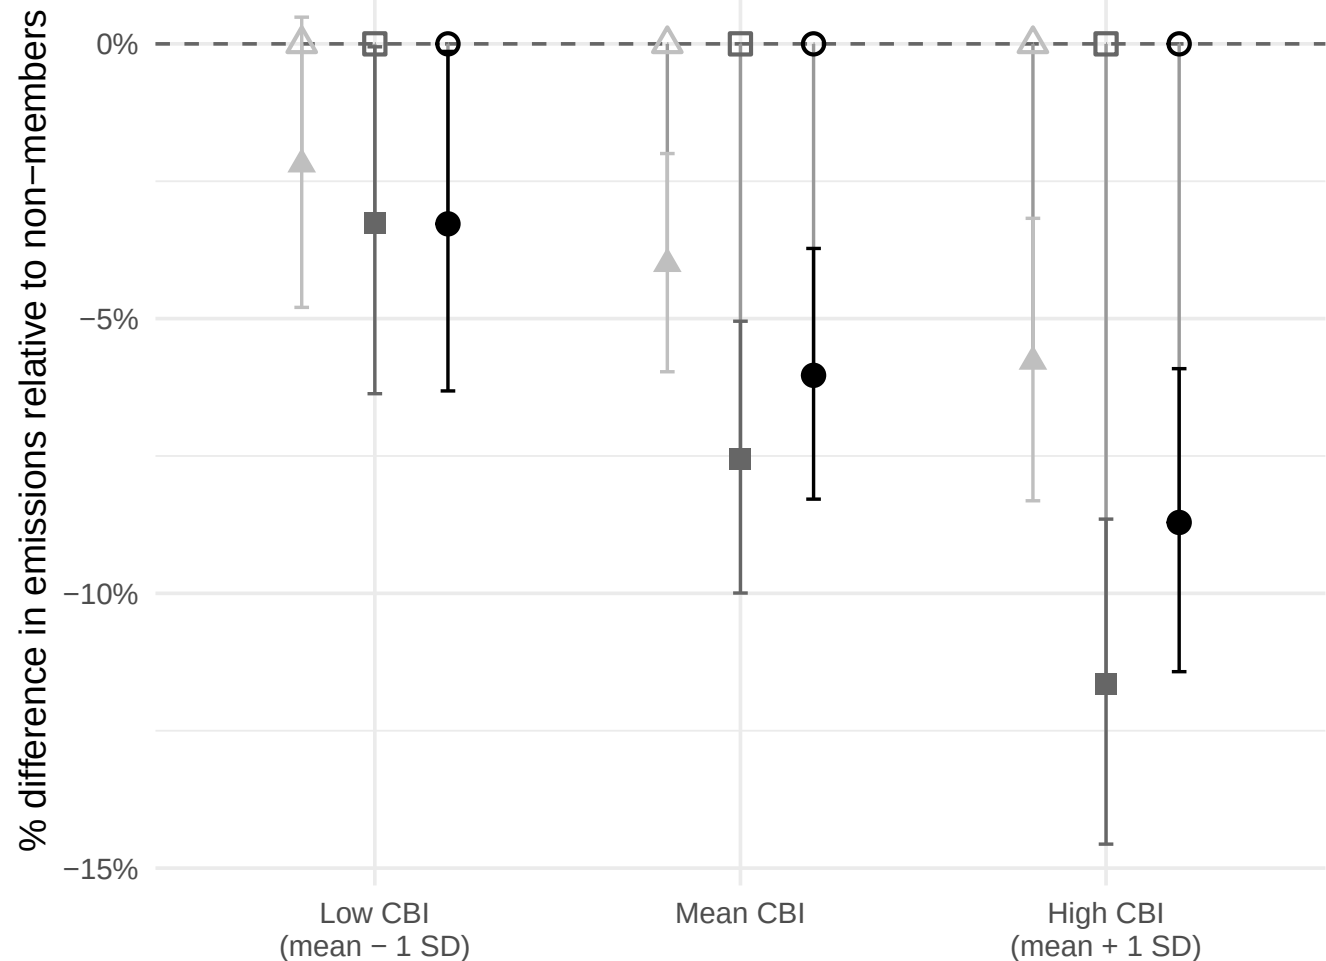

% change in emissions from NGFS membership

● GHG per Capita ● GHG per GDP per Capita ● Total GHG Emissions

NGFS Members vs. Non-Members

Predicted emissions gap at low, mean, and high CBI

● GHG per Capita ● GHG per GDP per Capita ● Total GHG Emissions

Hollow symbols = non-members baseline (0% by construction); filled symbols = NGFS members.
Circle = Total GHG Emissions; square = GHG per GDP per capita; triangle = GHG per capita.
Bars show 95% CI on the member-vs-baseline gap.
